

### **RISBRIDGER 905 FILTERS**

Due to lack of sales volume and additional increasing costs associated with making small quantities, Risbridger 905 filters are now obsolete items. They are superseded by our 1600 filters, which are made in larger numbers and are of a higher quality filtrations standard.

In order to use Risbridger Re-oiling pumps previously fitted with 905 filters, and used with Engine oils, customers will need to fit Stock Code 786/7.

In order to use Risbridger Re-oiling pumps previously fitted with 905/S filters, and used with phosphate esters (Skydrol etc), customers will need to fit Stock Code UZ/S/09 – Filter housing and 1/4" tailpiece with EP Seals.

This kit replaces the filter housing and tailpiece and includes our new safety item the 'No Filter No Flow' tailpiece.

This tailpiece prevents the use of the Risbridger Re-oiling Pump without a filter fitted, and has been a standard item on all new Risbridger Pumps since 2001.

Customers may order the 905 –1600 pump conversion kits directly for assembly to their existing equipment, or may return the pumps to Risbridger for conversion and a rebuild service. Please ask for details of our Pump Repair Service.

Stock Code: 786/7 Conversion kit for 905 filter pumps
