

### Boeing 777

#### Air Starter Fill & Drain Kit

(GE90 Engines Only)

Stock Code: 2886

This boxed set of equipment is designed to provide "superclean" oil filling and convenient clean drainage during removal and fitting of the engine starters.

The kit contains the following equipment:

1. **Stock code 2888 drain hose** with quick disconnect coupling.
2. **Stock code 2315 drain bottle** (5 litre) to fit 2888 hose only.
3. **Stock code 7090 re-oiling pump** to fit 1 U.S. Quart cans c/w hose, sight glass/bleed valve and quick disconnect coupling.
4. **Stock code 2887 fill hose** with quick disconnect coupling to fit 7090 pump only.

Size: 68 x 38 x 46cms

Gross weight: 10.54kgs

- The equipment is stored in a high strength, red plastic transit case. The compartmented case will also hold three spare 1 US quart cans.
- The fill and drain hoses have non-interchangeable couplings fitted to prevent cross-contamination of starter oil.
- If only one hose is used to drain a damaged starter and then the same hose is used to fill a new starter, particulate contamination is certain to occur.
- The stock code 7090 re-oiling pump is fitted with our 1600 series filter.
- The 1600 series filter has a rating of Beta 200 = 4.6 micron, in accordance with ISO16889, dispensing fluids to a cleanliness level of 17/15/12, in accordance with ISO4406, ensuring a long service life for the starter.

#### Materials:

Anodised Aluminium  
Stainless Steel  
Polyethylene  
Nylon 66  
Brass  
Viton/Nitrile Seals

#### Suitable for:

Aircraft Engine Oil 'fill to  
overspill' operations
