

RIS-FLANGE2-SO-SUCTION-MK2

2" suction module for use with 2" flange ports

RIS-FLANGE2-SO-SUCTION-R2

2" suction module for retrofitting on existing suction drop tubes

RIS-FLANGE2-SUCTION-MK2

2" suction module

RIS-FLANGE2-SO-SUCTION-R2M

2" suction module for retrofitting existing underground tank lids with existing 2" BSP threads

Part of the RIS-FLANGE Tanklid System, a comprehensive series of products to populate either suction or pressure system tank lids with high quality, efficient fittings that are easy to install, maintain and test. This system also allows simple disassembly and reconfiguration of layout on tank lids using only hand tools.

- Provides superior sealing performance, ensuring optimal suction performance.
- Lower installation costs - can be fitted to tanks in the factory or on site.
- Easy to fit to the tank lid, allows 360° rotation of modules to align with pipework entry.
- Available with 'shut-off' test fitting capability or plain 'elbow' style.
- Suitable for use with Bio-Fuel blends up to 90%.
- Eliminates leak paths with blind hole tappings on lid.
- Compatible with all pipework brands.
- Flexible connectors available which make fitting and servicing easier and remove stress from pipework.
- 2" light weight aluminium suction drop tubes available.

Materials:

Anodised Aluminium
Viton A (FKM)
Delrin (Polyacetal)
Stainless Steel

Suitable for:

Petroleum Spirit (including Ethanol Blends up to 90%)
Diesel
Bio Diesel/FAME Blends
